

'Aging in Place'  
*Home* Evaluations

**1-833-851-2163**

Live independently at home with a  
**Halcyon Rehab at Home** evaluation today!

'Aging in Place' is becoming more well-known and common. The desire for adults to remain at home as we age and move through the stages of life continues to increase. If you have had a recent surgery, or debilitating health issue and plan to return back home, we can help you be successful!

**Halcyon Rehab at Home**, is proud to offer Home Evaluations by our Occupational Therapists. Occupational Therapists are trained to identify obstacles and barriers which may create an unsafe environment for those living with disabilities or other limitations.

For a **flat fee of \$300.00** a licensed OT will visit your home to complete a comprehensive home evaluation. The cost for current patients is **\$250.00**. The home evaluation is not covered by your insurance. Details of the safety recommendations or home modifications will be provided.

### A Home Evaluation Includes:

1. An **assessment** of your individual needs, abilities and daily obstacles.
2. Recommendations to **increase safety** within the home.
3. Identify, suggest and demonstrate different **equipment, furniture and techniques** to help with daily activities.
4. Collaborate with a **home contractor to modify or build within the home** as needed to best meet your needs.

THERAPY AT YOUR DOORSTEP

**Halcyon Rehab at Home** is dedicated in helping our patients live independently in their own homes for as long as possible!

Contact us today for more information or to set up a home evaluation.
